DETAILED ACTION

Allowable Subject Matter

1. Claims 1-9, 29-37, 58-59, 61-62 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 29 are considered allowable since when reading the claims in light of the specification (MPEP § 211.01) or In re Sneed, 710 F.2d 1544, 1548, 218 USPQ 385, 388 (Fed. Cir. 1983), none of the references of record alone or in combination disclose or suggest the combination of limitations specified in independent claim 1, includes a database has user contact information and device ID information (supported at e. g. ¶ 0028), the database is populated to an operator when the server is not receiving a continuity signal within a period of time which will generate an alert to the operator (supported at e. g. ¶ 0030), and the operator will contact the user by using the contact information from the database (supported at e. g. ¶ 0030).

The closest prior art (McElhatten, Patent 7073189), teaches a set top terminal sends a heartbeat signal to indicate the set top terminal on/off state. When there is no heartbeat signal received in the headend, the headend stop the program transmission to the set top terminal (there is no alert generated to the operator under this condition). Gammie et al. (Patent # 5237610) discloses using multiple encrypted keys in broadcast signal to protect service provider. Donlan et al. (Pub # 2004/0088734) discloses a database with user contact information and device information. Hrastar et al. (Patent #

Art Unit: 2426

6272150) discloses using different color to indicate devices status in the network.

Menard et al. (Pub # 2002/0177428) discloses false alarm system that will contact the user. However, the references taken singularly or in combination do not teach a system that generating an alert to the operator when the continuing heartbeat signal is not received with a period of time, and the system also showing the operator the user contact information alone with the device information with the alert in order for the operator to contact the user.

Inter alia, independent claim 29 is allowed for reason similar to those described above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
